

There is no policeman to enforce the laws of health and to call "stop!"

When you are in danger from disease, but Nature has her own danger signals. When pain shoots like a lightning flash along the nerves, when the heart beats feebly or irregularly, when there is unusual fullness after eating, sour risings, headache, coated tongue or irritable temper, then Nature is plucking you by the sleeve and calling "stop!" To neglect these warnings is dangerous. Derangement of the stomach and its allied organs is but the beginning of trouble for the whole body.

Before his death Three Finger Jack made a confession implicating all connected with the hold-up and will be the main damaging testimony against the prisoners.

Second, in rheumatism in thigh joint, almost prostrating him with severe pain which was relieved by two applications rubbing with the liniment on retiring at night, and getting up free from pain. WHEN NATURE

Needs assistance it may be best to render it promptly, but one should remember to use even the most perfect remedies only when needed. The best and most simple and gentle remedy is the Syrup of Figs, manufactured by the California Fig Syrup Co.

Constable Leonard Page came in today from Johnson Camp to identify the Mexican prisoners in jail here as the men wanted for the murder of Scott Weatherly. Page after seeing the prisoners stated they are not the men wanted and they will consequently be released from custody. He states the murderers are undoubtedly below the line. The Mexican authorities know the men and are keeping a look out for them inasmuch as they are wanted in Mexico also on a criminal charge. Their ultimate capture seems probable.

John Henry Wood secretary of the Cobre Grande has unfortunately gotten into trouble. Sheriff White on Wednesday arrested him on an official telegram from El Paso on the charge that he had been indicted at El Paso on a charge of perjury. Wood gave bonds at Nogales in the sum of \$2,000 to appear and was released. It is to be regretted that the Cobre Grande has taken a turn which results in criminal proceedings.—Star.

J. I. Carson, Proprietor, Washington, Pa., says, "I have found Kodol Dyspepsia Cure an excellent remedy in case of stomach trouble, and have derived great benefit from its use." It digests what you eat and can not fail to cure.

From Frank Perry and Leonard Page who are over from Johnson, the prosperous mining camp in the Dragoon three miles from Russellville, it is learned that the camp has a population of over 300. At the Peabody mine 165 Mexican miners are on the payroll and two carloads of copper ore is shipped to El Paso daily. The Peabody is under the supervision of H. J. Clifford. At the Mammoth mine some 35 or 40 Americans are employed and the property is looking exceedingly well. These mines are being opened by an eastern company and is in charge of Mr. S. S. Campbell. Messrs. Perry, Mitchell and Wien, own some promising copper claims which are also doing well. Several groups of mines are being negotiated for under bond and the district is growing in prosperity. The Wolfman claims about Russellville are valuable and attracting much attention. Altogether that section is rapidly coming to the fore in mining development.

All other remedies and doctors could give her no help, but she says of this Royal Cure "It soon removed the pain in my chest and I can scarcely remember doing before. There is a growing call for asbestos, asphalt and mica, caused by electrical insulation. The price is governed by the size but small pieces can be utilized. It is said the merchantable asphalt can never exceed the demand owing to the many new uses to which it is put. Prospectors will do well to look after these minerals.

The solar eclipse which will occur next Monday will be an event of rare occurrence and surpassing grandeur, as seen at certain points on the earth's surface. For weeks and months astronomers in all parts of the world have been hastening to the path of observation for the purpose of scientific observation, and the coming eclipse will probably be seen and watched carefully by a greater number of experts than in similar events in history. Arizona is just on the edge of the path of the eclipse and will not be visible here.

The number of abandoned mines which will be reopened the present season in the mining districts of the West furnishes a convincing object lesson of the advances which have been made in the science of mining and ore treatment. Mines which were abandoned a few years ago after the oxidized ore bodies were exhausted, because the refractory ores could not then be treated at a profit, are now being reopened and operated with handsome returns.

A Nebraska editor, in putting the finishing touch to an elaborate description of the belle of the ball, said: "And her dainty feet were encased in shoes that resembled fairy boots."
